### **BOARD:**

Denis O'Meara: Chairman  
Justin Brown: MD  
John Ribbons: Non-Exec

### **KEY PROJECTS:**

BUTCHERBIRD (100%)  
Manganese, Copper

PEAK HILL (85-100%)  
Gold

DURACK (earning 85%)  
Gold, Copper

MT PADBURY (100% of gold)  
Gold, Manganese, Iron

### **KEY SHARE POSITIONS:**

AUVEX RESOURCES LTD  
7,500,000 FPO Shares

BUXTON RESOURCES LTD  
3,010,000 FPO Shares

LITHEX RESOURCES LTD  
1,525,000 FPO Shares

EXTERRA RESOURCES LTD  
2,000,000 FPO Shares

## **BUTCHERBIRD MANGANESE EXPLORATION UPDATE**

- RC exploration drilling completed over several priority manganese targets.
- Significant manganese mineralisation intersected in several areas coincident with EM anomalies.
- Samples have been submitted for assay with results pending.

Montezuma Mining Company Ltd ("Montezuma") is pleased to advise it has completed the next phase of RC drilling at the Company's 100% owned Butcherbird Manganese/Copper Project.

The programme comprised a total of 110 holes for 3,233m, and was designed to test several high priority target areas identified as prospective from the results of an EM survey completed in late 2010. All relevant intervals have been submitted to the laboratory for manganese suite analysis with assays pending.

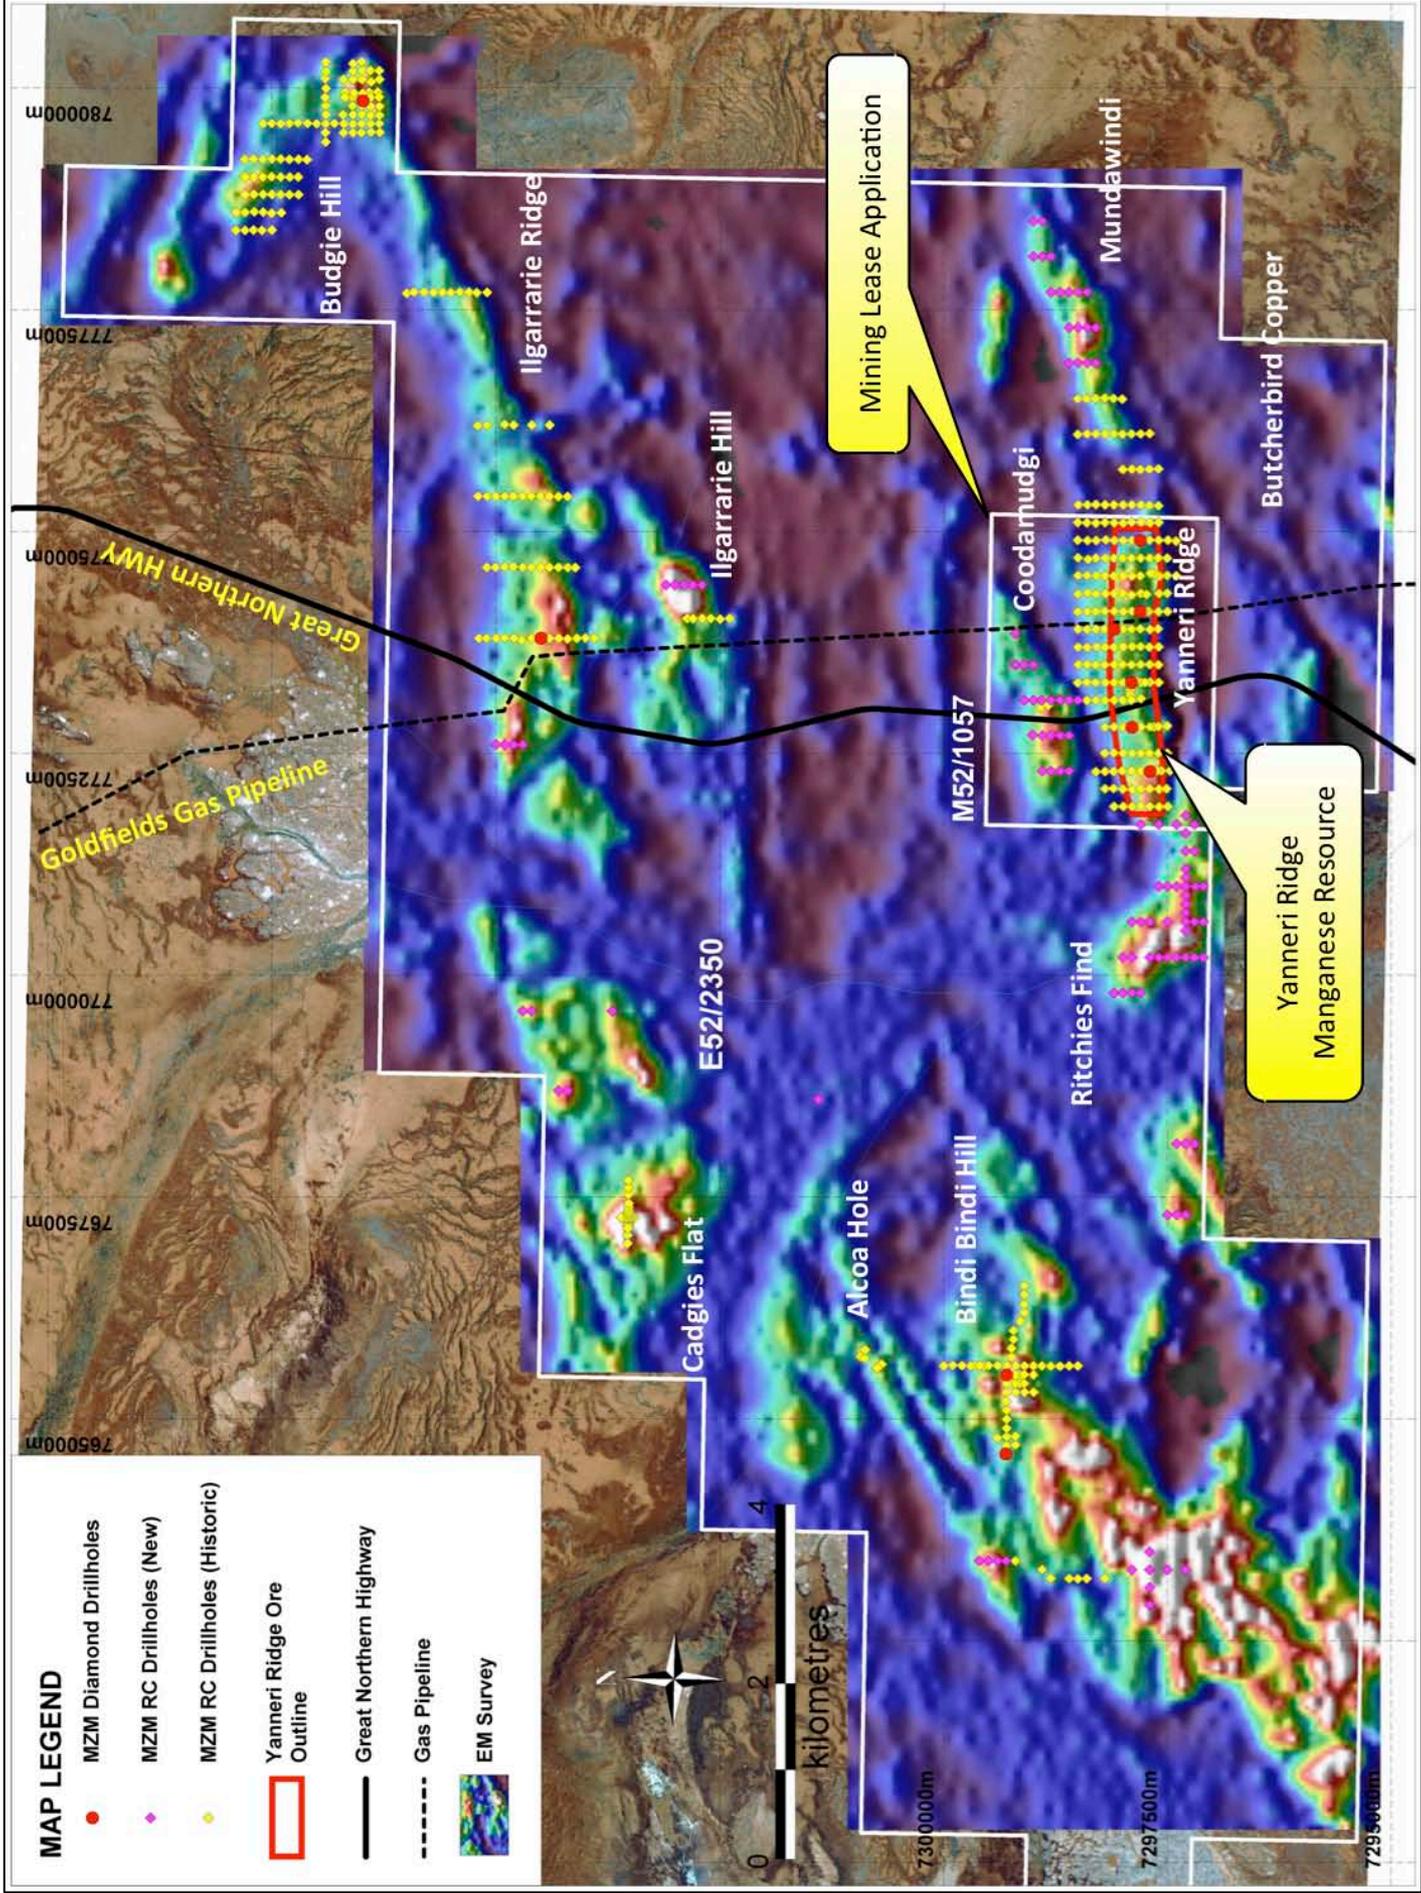

Visual logging of the completed holes confirms significant manganese mineralisation at Mundawindi, Coodamudgi, Ritchies Find, Ilgarrarie Hill, Cadgies Flat and Ilgarrarie Ridge. The mineralisation is typically coincident with the EM anomalies and consistent with the mineralisation style identified to date within the Project, further confirming the large tonnage potential of Butcherbird.

In addition to the manganese work, a planned ground IP survey over the Butcherbird Copper Prospect has been pushed back to late July 2011. This was originally scheduled to be completed in parallel with the manganese drilling programme, however due to gear failure, the contractor has been unable to complete the programme on schedule.

When completed, the IP survey programme will attempt to identify the highest priority target zones along approximately 4km of strike over which the target shear zone can be traced. Limited drilling along this target corridor in 2010 confirmed the presence of a significant zone of copper sulphide mineralisation and it is regarded as a priority exploration target. Drilling of the resultant IP targets will be completed as soon as practicable once the IP programme is complete.
