**KEY PROJECTS:**

PEAK HILL (85-100%)  
Gold

DURACK (earning 85%)  
Gold, Copper

BUTCHER BIRD (100%)  
Manganese, Copper

MT PADBURY (100% of gold)  
Gold, Manganese, Iron

**KEY SHARE POSITIONS:**

AUVEX RESOURCES LTD  
7,500,000 FPO Shares

BUXTON RESOURCES LTD  
3,010,000 FPO Shares

## RC DRILLING HAS COMMENCED AT PEAK HILL AND BUTCHER BIRD

- An RC Drilling rig has commenced work on programmes at Peak Hill and Butcher Bird.
- Programme will test for gold, high-grade manganese and sulphide copper mineralisation.
- An estimated 9,000m will be completed over the next 2-3 months with follow up work planned on an ongoing basis.
- Represents the start of an aggressive 6-9 month programme of work designed to significantly advance the Company's Projects.

Montezuma is pleased to advise that an RC Drilling Rig has commenced work at the Peak Hill Gold Project in the Murchison region of WA. The initial phase of work at Peak Hill will comprise approximately 5,000 metres. The drilling will test extensions to known mineralised areas, follow up the recent success at the Windsor Zone within the Durack Project area as well as testing a number of new targets.

Following the completion of the programme at Peak Hill, the rig will be moved north to the Company's 100% owned Butcher Bird Project where it will complete a first pass programme of approximately 4,000m. The work will test the potential for high grade manganese and copper mineralisation, following up the highly encouraging results received from surface sampling to date.

The Company looks forward to making further announcements as this exciting new phase of aggressive exploration gets underway.
